

J-Profile Part 179

EXTRUDED PROFILES

Movex® provides a new generation of high-performance profiles developed and produced with the most up to date technology. Experienced engineers work around the clock on more than 50 extrusion machines, perfecting almost 2.000 high-quality products of different types and sizes. Movex® profiles are produced from top-quality UHMW-PE, with the possibility of enhanced performance with the use of our super-performing materials BluLub®, Titanium White® and AS. Standard 3 m (10 ft) or 6 m (20 ft) profiles are typically shipped by common carrier. Selected items can be coiled into cartons for more convenient shipping. Products stored in coils will have the tendency to retain a certain deformation when uncoiled, therefore consistency in the profile cross section over the full length of the coil cannot be guaranteed.

BluLub® is the Movex super-performance compounded Ultra High Molecular Weight Polyethylene material, with the latest generation of solid lubricants, able to contribute improving PV properties (limiting pressure velocity) compared to standard UHMW-PE, especially in applications with limited lubrication, higher speeds and/or higher loads. BluLub® ensures high wear and abrasion resistance, requires less energy and with the lowest coefficient of friction, improves the product stability and wear life of sliding parts.

J PROFILE with NOSE 26x4 BluLub L=200ft/60m

Article-Nr: P17902B-60

Technical features

Series	J-Profile
Unit of measure	Meter
Material	Plastic profile
Part:	P179

Material & color:	BluLub
Supply length:	60 m / 200 ft coils
Operating Temperature °C:	-40÷80 °C
Supplementary informations:	Fit on 2,5 to 3,5 mm
	Height mm 16,5; Width mm 26
