

820 Flat Top

CHAINS > PLASTIC CHAINS

Although the 820 series chain is now a commodity product, Movex created an optimized version in which the gap between the links is 45% lower and the contact surface is increased up to a maximum of 15%: these two features help to improve the product stability. The new design, already available, will replace the current one and all part numbers will remain unchanged, since it is completely interchangeable and connectable with the current one.

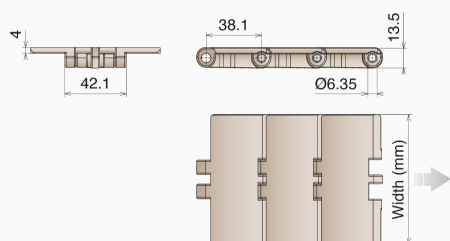

Flat-Top Chain Lf 820 K 350

Article-Nr: P11010104

Technical features

Series	820-828-831-878-879-880-888
Pitch	38.1 mm
Thickness	4 mm
Surface Type	FT - Flat Top
Functionality	Straight running chain
Unit of measure	Meter
Width:	K 350 - 88,9 mm
Material:	LF - Low friction acetal (01)
Part:	P1101
Back flex radius:	50 mm
Pin material:	Stainless steel
Box:	10 ft - 3,048 m
Max working load:	1625 N
